Pentecom
Experience. Expertise. Excellence.

Transforming Legacy Data into Structured Clarity

- Legacy paper and electronic data converted to modern, structured formats.
- AI-enabled processes customized for smarter data transformation anchored by repeatable, proven automation.
- Tailored, standards-driven solutions that support industry and defense program objectives.
- Results-driven team providing impactful, innovative and transparent solutions.
- Deliverables validated through automated and manual quality assurance processes.

Problem

Tedious manual processes are brought about by legacy technical data that contains inconsistent structures, outdated specifications, and complex formatting.

Solution

Our proprietary automation tools and processes maximize conversion efficiency for commercial and military customers. Pentecom modernizes data, ensuring accuracy and usability based on industry-specific standards.

We'll save you from the tedious manual process.

Contact us today at info@pentecom.com.
We can modernize your legacy data intelligently.

Conversion & Automation

Schema-aware migration. Validation suites and repeatable pipleines.

Data conversion that leverages technology to deliver accurate, standards-compliant results.

How Pentecom Can Help

Pentecom delivers end-to-end data conversion and cleanup services transforming paper and electronic documents into your needed format. We offer expert automation and stylesheet development, and sustainment support from project planning through delivery.

- DITA (Darwin Information Typing Architecture)
- DocBook
- iSpec 2200
- Microsoft Word
- MIL-SPEC
- PDF
- S1000D
- SGML
- XML

We have developed a flexible, multi-tiered process of verifying automated conversion, enhancing the output for usability in the new environment, and thoroughly quality checking the product before delivery.

We use AI where it makes sense, along with direct programming and manual effort when the project demands it. Our intentional approach enables us to deliver the best product for the best price without sacrificing the quality that is Pentecom's hallmark.

We use AI where it makes sense, along with direct programming and manual effort when the project demands it. Our intentional approach enables us to deliver the best product for the best price without sacrificing the quality that is Pentecom's hallmark.

Why Our Customers Trust Us

Our proven ability to address complex technical data challenges means if unexpected challenges arise, we don't take shortcuts. We evaluate what's best for the customer and then go the extra mile to ensure the final product is dependable.

We combine technical standards expertise, strength in software development, proven automation, and a collaborative customer focus.

Your data. Your way. Contact us today and see how we can modernize your legacy data intelligently and save you from the tedious manual process.
